

EDUCATION

Degree	Specialization	Institute	Year	CPI
B.Tech	Electronics & Communication Engineering	NBKRI	2021-2025	7.1
HSC BIEAP	Physics, Chemistry, & Mathematics	Sri chaitanya College	2021	8.9
SSC	-	Little Angels School	EM 2019	9.3

WORK EXPERIENCE

- **Communication Intern [BSNL]** Jul- Aug 2024
 - Assisted in the maintenance and troubleshooting of telecommunications systems and networks.
 - Supported the installation and configuration of network equipment, including routers, switches, and BTS.
 - Monitored network performance and conducted analysis to identify and resolve connectivity issues.
 - Collaborated with senior engineers to develop documentation and reports on network performance metrics.
- **VLSI Intern [Rooman Technologies]** Feb - May 2025
 - Gained hands-on experience in VLSI design, simulation, and testing methodologies.
 - Worked with industry-standard tools for digital and analog circuit design.
 - Developed and verified HDL-based designs for FPGA and ASIC implementations.
 - Assisted in debugging and optimizing circuit performance for various applications.

PROJECTS

- **Obstacle Avoiding Robot**
 - Designed and developed an autonomous robot using Arduino to navigate and avoid obstacles.
 - Integrated ultrasonic sensors for real-time detection and avoidance of obstacles.
 - Implemented efficient algorithms for pathfinding and obstacle avoidance.
 - Conducted extensive testing to ensure reliability and performance in various environments.
- **IoT Based Multifunctional Robot for Defence Applications**
 - The Arduino processes ultrasonic sensor data to detect and avoid obstacles autonomously.
 - It enables safe navigation of robots in various environments without human control.
 - The ultrasonic sensors provide real-time distance measurements to help the robot make quick decisions for obstacle avoidance.

TECHNICAL SKILLS

- **Languages:** Basics of Python, Verilog
- **Tools:** MATLAB, Simulink, LabVIEW, Arduino, Raspberry Pi
- **MOOCs:** Digital circuits, Computer architecture

WORKSHOPS

- **Winter IIIT Workshop on Two-Wheelers Electrical Vehicles**
 - Participated in a comprehensive workshop focusing on the design, development, and implementation of two-wheelers electrical vehicles.
 - Gained hands-on experience in battery management systems, motor controllers, and vehicle dynamics.

- Problem Solving , Cricket, Hiking

EXTRA-CURRICULAR ACTIVITIES

- **IETE Student Forum**
 - Organized and managed events, workshops, and seminars for the IETE student chapter.
 - Coordinated with industry professionals and academic experts for guest lectures.
